## A Modern Day Classic

### The Ultimate Home Organ

With it's superb sounds, stunning rhythms, stylish compact cabinet and incredible ease of use, the ORLA MODENA is destined to become one of the finest home organs ever.

The ORLA MODENA is all things to all players.....

The compact space saving cabinet makes it delightful to look at and comfortable to play

The Sounds & Styles not only sound great.....they are extremely easy to access

Whatever your playing style the Modena can accommodate your needs

A true two manual instrument that also offers stunning keyboard type features

Above all.....it is a pleasure to play!

### Brand New MP3 Recorder

The Orla Modena features a new and easy to operate MP3 recorder/Player.

Record you party pieces in the organ.....getting all of the mistakes out of the way.... before transferring the file to MP3 format for playback through a computer or any MP3 compatible device.

Maybe you will produce your own CD to share your music with friends and family.

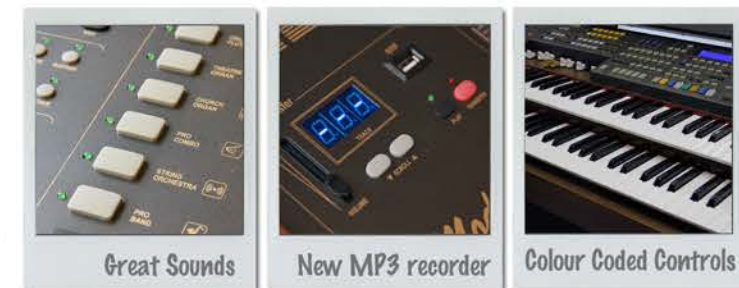

It is also possible to play along with your favourite MP3 tracks via the MP3 player.

### Stunning Styles

Styles are there to enhance your playing NOT to dictate your performance.....and that is just what the fabulous on board styles achieve on the Orla Modena.

They are both extremely musical and very authentic and will enhance your playing regardless of your chosen playing style.

From traditional Ballroom through to smooth Ballads, exciting Latin and great Country, there are sure to be styles there to suit your needs.

### Ultra Realistic Sounds

We all have our favourite types of sounds which is why the Modena offers a vast library of stunning voices. As well as the traditional Home, Theatre and Church Organ sounds there is also a wide choice of Instrumental, Orchestral & Band Sounds.

So if your preference is for Mantovani, Glenn Miller, Chet Atkins or stunning a Grand Piano then we have the sounds for you.....but if the mighty Blackpool Wurlitzer is more your style, then the Modena will not disappoint.

Most importantly all of these sounds are easy to access.....refreshing in a world dominated by complex gadgets and equipment.

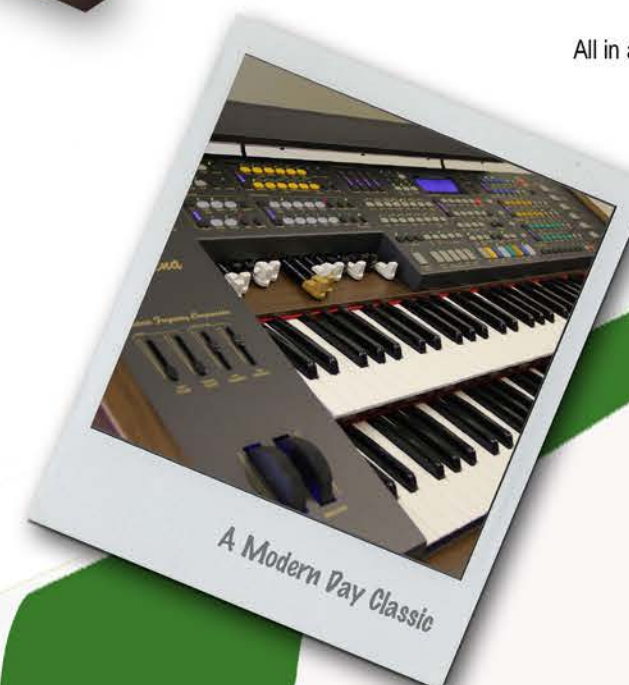

The Orla Modena truly is "*An Instrument For All*"

### New Improved Amplification

The new 5 channel amplification system now provides the ultimate in quality and definition of sound. The 150 watt system delivers power with quality.

The Modena's SCS speaker system is equally at home with rich bass sounds or higher treble tones and the overall sound of the instrument can be tailored to a specific setting by using the on board **Dynamic Frequency Compensator**. High and Low Frequency adjustment allows you to find the sound that suits both you and the room in which the instrument is being played.

All in all a sound system that delivers.
